- 1 Active Recall Dont just passively read your textbook Test yourself frequently Use flashcards physical or digital practice questions and quiz yourself regularly This forces your brain to actively retrieve information strengthening memory consolidation Example Instead of rereading the chapter on the respiratory system cover the text and try to list the organs involved and their functions
- 2 Spaced Repetition Review material at increasing intervals This combats the forgetting curve and ensures longterm retention Apps like Anki can help you schedule your reviews efficiently
- 3 Visual Learning AP is highly visual Utilize diagrams models and videos extensively Draw diagrams yourself this actively engages your brain and reinforces learning
- 2 Visual Description Example The Heart Imagine a clenched fist thats roughly the size of your heart Now picture it with four chambers two atria receiving chambers on top and two ventricles pumping chambers below Blood flows through valves that prevent backflow ensuring unidirectional circulation
- 4 Mnemonics and Acronyms Create memorable acronyms and rhymes to remember sequences or lists For example to remember the order of the cranial nerves Olfactory Optic Oculomotor etc create a sentence where the first letter of each word corresponds to the first letter of each nerve
