competition is recognised as a key driver of growth and innovation competition ensures that businesses continually improve their goods and services whilst striving to reduce their costs anti competitive conduct by businesses such as price fixing causes harm to the economy to other businesses and to consumers it is small businesses and the consumer who ultimately pay the price for anti competitive conduct a coherent competition policy that is both effectively implemented and effectively enforced is essential in driving growth and innovation in a market economy the importance of competition was recently emphasised when the eu ecb imf troika included a number of competition specific conditions to the terms of Ireland's bailout both Irish and community

law recognise the right for parties injured by anti competitive conduct to sue for damages this right to damages in theory allows those that have suffered loss to recover that loss whilst helping to deter others from taking the illegal route to commercial success however private actions for damages in ireland are rare this book asks what the purpose of private competition litigation is and questions why there has been a dearth of this litigation in ireland the author makes a number of suggestions for reform of the law to enable and encourage private competition litigation the author takes as his starting point the european commission s initiative on damages actions for breach of the ec antitrust rules and compares the position in ireland to that currently found in the uk and us

this book consists of a set of nineteen original essays on important recent antitrust cases each essay discusses a single case and was written by economists who actually participated in the case the cases are organized into three major sections horizontal structure horizontal practices and vertical and complementary market issues each section has an introductory overview essay written by the editors in this third edition eleven new cases have been added and eight cases from the second edition have been updated and shortened

in the late 1990s the european commission embarked on a long process of introducing a more economic approach to eu antitrust law one by one it reviewed its approach to all three pillars of eu antitrust law starting with article 101 tfeu moving on to eu merger control and concluding the process with article 102 tfeu its aim was to make eu antitrust law more compatible with contemporary economic thinking this book argues that the commission s new understanding of the law has many benefits its key principles are logical translate well into workable legal concepts and promise a great degree of accuracy however it also has a number of serious drawbacks as it stands most worryingly its revised interpretation of the law is to large extents incompatible with the case law of the european court of justice which has not been swayed by the exclusive consumer welfare aim this situation is undesirable from the point of view of legal certainty and the rule of law

the proliferation of merger control laws in the absence of a mechanism to coordinate the transnational merger review places an unnecessary burden on merging parties and runs the risk of divergent outcomes which at times cause friction among nation states

david j teece has led the way in integrating industrial organisation technological innovation and strategic management this book and its companion volume reveal how he achieved it

mueller discusses the economic challenges faced as a result of events in the latter third of the 20th century the formation of the european union the collapse of communism in east europe and the deregulation and privatization movement that spread from north america to europe
